

Want to learn more about Happier Camper's gelcoat options, or look into choosing your own custom options?

CUSTOMIZATION PROCESS

Whether you are matching your trailer to your brand colors or want to express your individuality, Happier Camper can help you customize your trailer's gelcoat, wood laminate, and fabric choices.

Because the customization process can be quite lengthy (especially for gelcoat), it's important to inform the Production team about your decisions as soon as possible. The Production team will work with you throughout the customization process. In the event that your desired laminate or fabric choice is not available, the Production team will work with you to find a suitable alternative.

CUSTOM GELCOAT PROCESS

Happier Campers are coated in gelcoat which is known for being more lustrous and longer-lasting than paint.

Creating a custom gelcoat is a lengthy process and we have very specific requirements that will help us achieve your desired color. Please note, Happier Camper cannot color match anything that is shiny, such as metal, or glittery, such as a car paint sample.

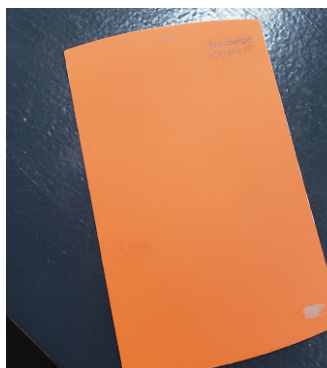

Features of a Good Sample:

- Smooth surface
- Solid color
- 3" x 3" or larger
- Glossy samples are OK
- No shine or glitter

We don't recommend sending in a textured fabric sample as the grooves from the threads can create a variance in color due to lighting and shadows. Glass, however, can work if it is solid and nontransparent.

Examples of Great Samples:

- Print out of the color on paper
- A printed photo
- Paint on a hard surface, such as plastic or wood
- Paper paint samples from hardware store

Examples of great samples
Left: A paper paint sample
Right: Paint on a hard surface (with matching gelcoat underneath)

Once you have your sample ready, please mail to address below and notify the Production team at production@happiercamper.com.

RETIRED GELCOAT COLORS

Every few years, Happier Camper retires some colors from our standard color options. You might have seen images of these colors, such as Sequoia Orange or Mill Valley Evergreen, on our website or social media.

Though these options are officially retired, we can still offer them to you as a custom color option. You can let the production team know that you would like to proceed with a custom gelcoat for your camper.

CUSTOM WOOD LAMINATE

Happier Camper uses high-quality laminate from **Formica** for our Adaptiv™ components and shelves. You can order samples directly from **Formica's Commercial line** by creating an account on their website.

We recommend having a few choices as some might not be in stock. Once you have your decision, please contact production@happiercamper.com with the product information. They will share a sample with you for your approval. There is a limit to the number of samples you can select without causing delays to your order.

CUSTOM SUNBRELLA FABRIC

Easy to clean and UV-resistant, Happier Camper uses Sunbrella fabric. If you'd like to choose a custom Sunbrella fabric, you can select from a suite of options by **Trivantage**, our supplier. We can get samples from the **Fusion Collection** and **Dimension Collection** under their Sunbrella Upholstery section.

In some instances, fabrics are unavailable due to supply chain disruptions. Please choose 3-5 samples in the event that your original choice is unavailable.

Send the product number or the website link to production@happiercamper.com to get the samples ordered and receive a quote.

Please note that once you make your selection, our upholstery team will have to confirm the material as some choices have different thicknesses that may not work with our design patterns.

Please email production@happiercamper.com if you have questions about this process.
